HTML BASICS

□ Anatomy of a Hyper Text Markup Language Document:

```
<html>
<head>
  <title>Page Title!</title>
</head>
<body>
  This is my first page !!!
</body>
</html>
```

HTML BASICS

□ Anatomy of a Hyper Text Markup Language Document:

```
<html>
```

```
<head>
```

```
  <title>Page Title!</title>
```

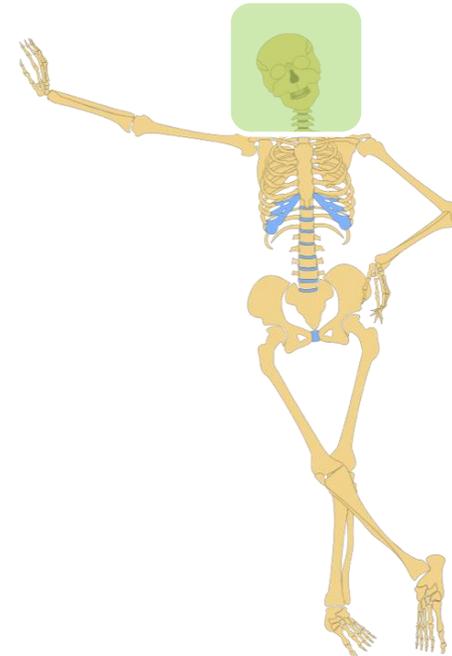

```
</head>
```

```
<body>
```

```
  This is my first page !!!
```

```
</body>
```

```
</html>
```

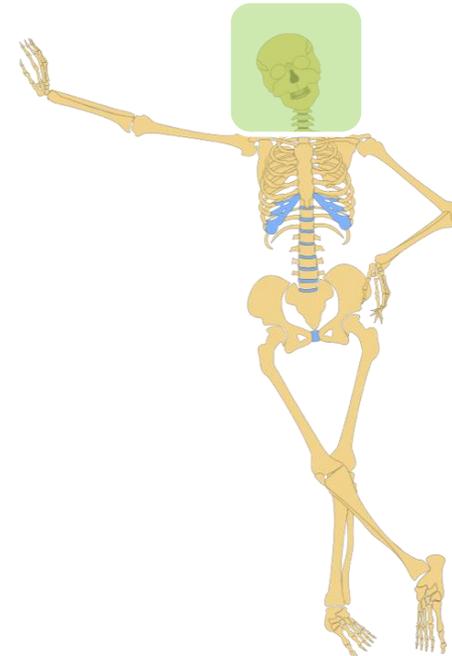

HTML BASICS

□ Anatomy of a Hyper Text Markup Language Document:

```
<head>  
  <title>Page Title!</title>  
</head>
```

○ head section:

TAG	Description
title	Defines page's title
script	Defines scripting language
style	Defines CSS
...	...
meta	Defines metadata → SEO

HTML BASICS

□ Anatomy of a Hyper Text Markup Language Document:

```
<html>
<head>
  <title>Page Title!</title>
</head>
<body>
  This is my first page !!!
</body>
</html>
```

HTML BASICS

□ Anatomy of a Hyper Text Markup Language Document:

```
<html>  
<head>  
  <title>Page Title!</title>  
</head>  
<body>  
  This is my first page !!!  
</body>  
</html>
```

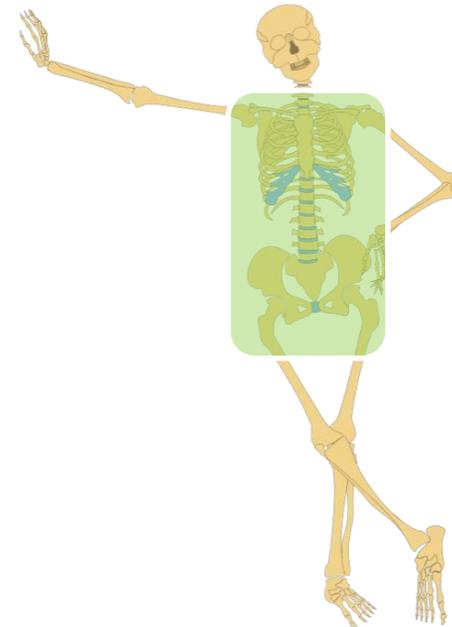

HTML BASICS

□ Anatomy of a Hyper Text Markup Language Document:

```
<body>  
  This is my first page !!!  
</body>
```

○ body section:

TAG	Description
bgcolor	Defines background's color
text	Defines text's color
link	Defines link's color
...	...
background	Defines background image

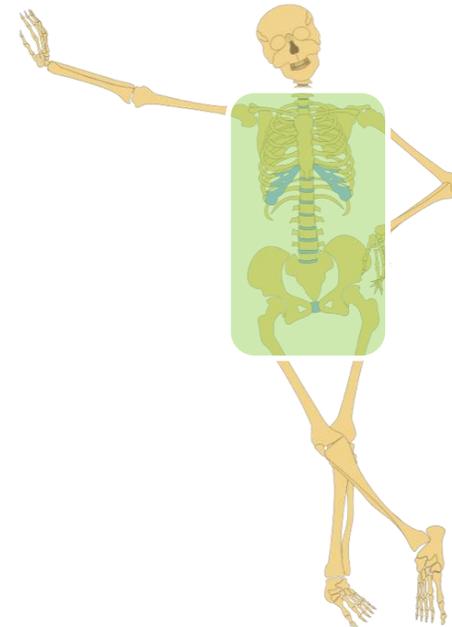

HTML BASICS

□ Anatomy of a Hyper Text Markup Language Document:

```
<body>  
  This is my first page !!!  
</body>
```

○ body section:

TAG	Description
h(1-6)	Defines header style
p	Defines paragraph
u/o/d l	Defines lists
...	...
form	Defines forms

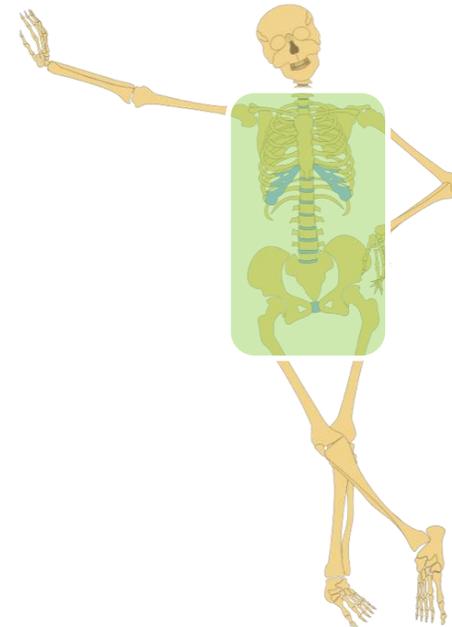

HTML BASICS

□ Anatomy of a Hyper Text Markup Language Document:

```
<body>  
  This is my first page !!!  
</body>
```

○ body section:

TAG	Description
<code>table</code>	Defines table
<code>hr</code>	Defines lines
<code>a</code>	Defines links
...	...
<code>img</code>	Defines image

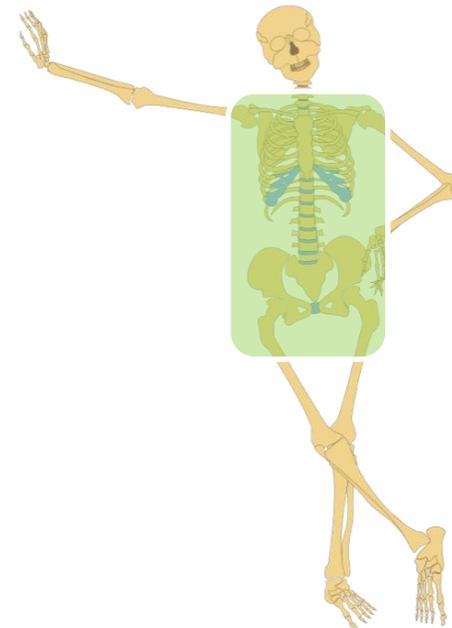

HTML BASICS

□ Anatomy of a Hyper Text Markup Language Document:

```
<body>  
  This is my first page !!!  
</body>
```

○ body section:

TAG	Description
b	Defines bold fonts
<i>i</i>	Defines <i>italic</i> fonts
<u>u</u>	Defines <u>underline</u> fonts
...	...
br	Defines line change

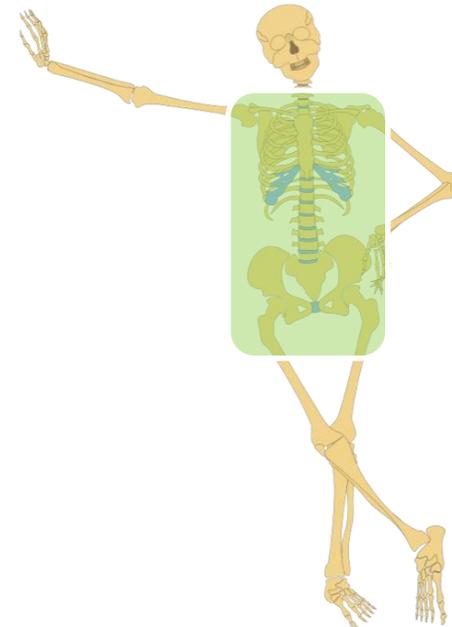

HTML BASICS

□ Anatomy of a Hyper Text Markup Language Document:

```
<body>
  This is my first page !!!
</body>
```

○ body section - forms:

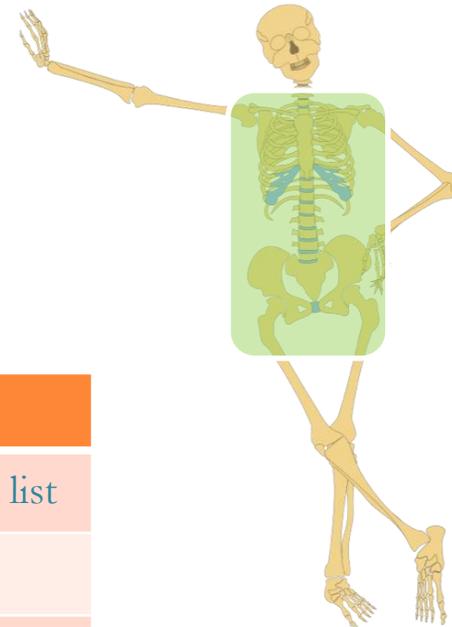

TAG	Description
form	Defines a form for user input
input	Defines an input control
textarea	Defines a multiline input control
...	...
label	Defines label for an <input>

HTML BASICS

□ Anatomy of a Hyper Text Markup Language Document:

```
<body>
  This is my first page !!!
</body>
```

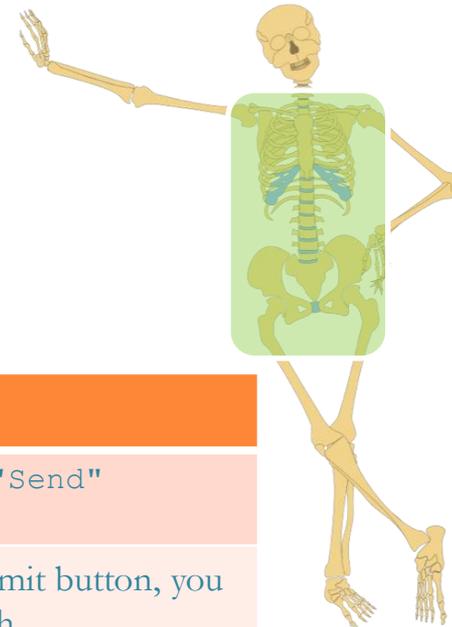

○ body section - forms:

TAG	Description
option	Defines an option in a drop-down list
button	Defines a clickable button
select	Defines a drop-down list
...	...
optgroup	Defines a group of related options in a drop-down list

HTML BASICS

□ Anatomy of a Hyper Text Markup Language Document:

```
<body>
  This is my first page !!!
</body>
```

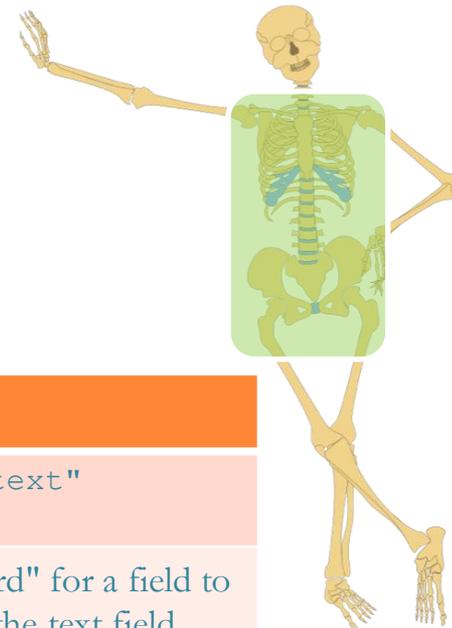

○ body section - forms:

object	button
code	<code><input type="button" value="Send" onclick="myfunction()"></code>
description	If it is a simple button and not a submit button, you need to associate JavaScript code with the onclick event to execute something.
appearance	

HTML BASICS

□ Anatomy of a Hyper Text Markup Language Document:

```
<body>
  This is my first page !!!
</body>
```

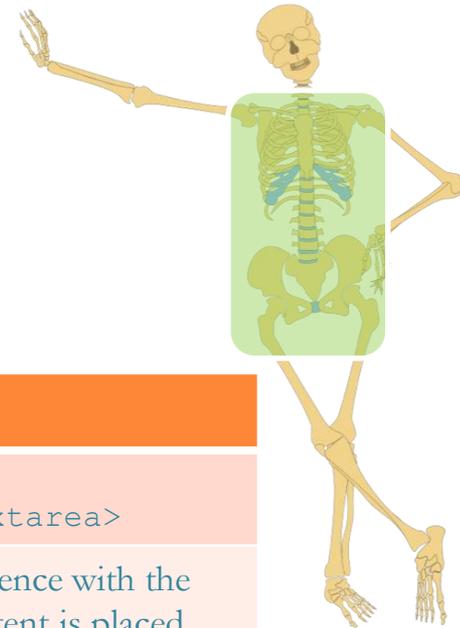

○ body section - forms:

object	Text field
code	<code><input type="text" name="mytext" value="default text"></code>
description	Other attributes are: type = "password" for a field to the hidden content, size = width of the text field, maxlength = max # characters.
appearance	<input type="text" value="default text"/>

HTML BASICS

□ Anatomy of a Hyper Text Markup Language Document:

```
<body>  
  This is my first page !!!  
</body>
```

○ body section - forms:

object	Text area
code	<code><textarea name="textarea">content</textarea></code>
description	Text field on several lines. The difference with the previous object is that the initial content is placed between the starting and ending tags, not in an attribute.
appearance	

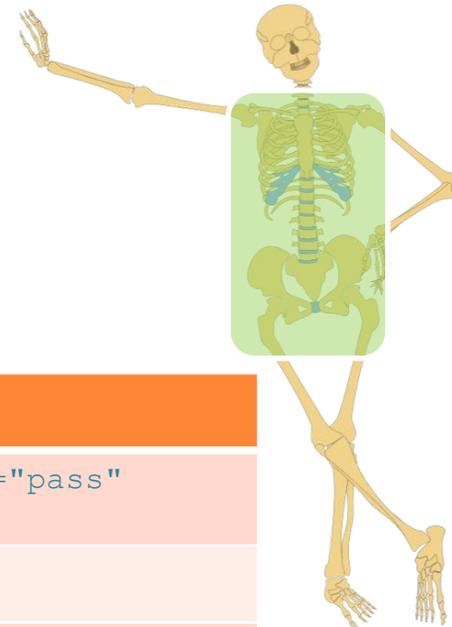

HTML BASICS

□ Anatomy of a Hyper Text Markup Language Document:

```
<body>
  This is my first page !!!
</body>
```

○ body section - forms:

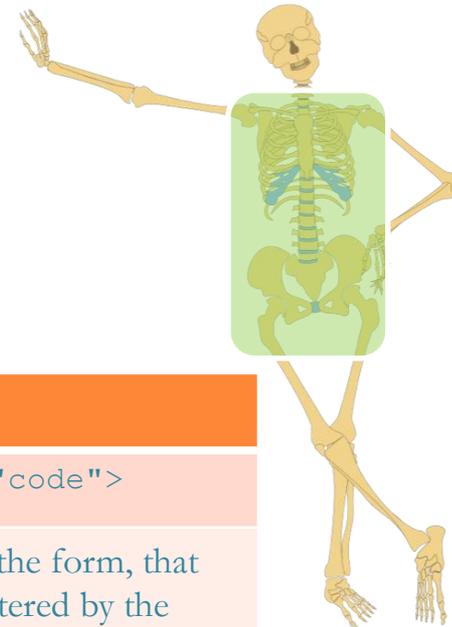

object	Password
code	<code><input type="password" name="pass" value="12345"></code>
description	...
appearance	

HTML BASICS

□ Anatomy of a Hyper Text Markup Language Document:

```
<body>  
  This is my first page !!!  
</body>
```

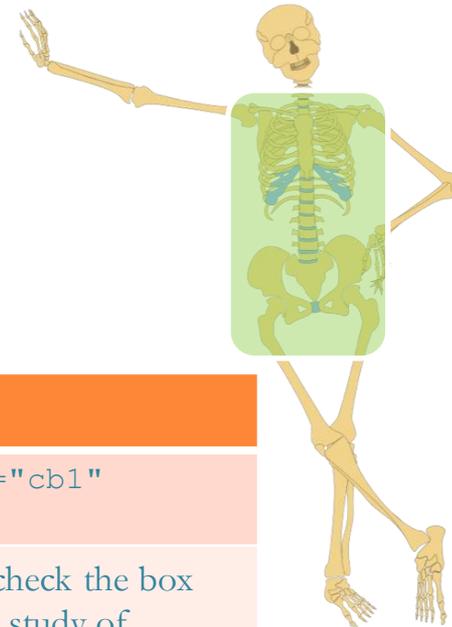

○ body section - forms:

object	Hidden field
code	<code><input type="hidden" value="code"></code>
description	Allows to add data to values sent by the form, that are defined by a script rather than entered by the user.
appearance	

HTML BASICS

□ Anatomy of a Hyper Text Markup Language Document:

```
<body>  
  This is my first page !!!  
</body>
```

○ body section - forms:

object	Checkbox
code	<code><input type="checkbox" name="cb1" value="true" checked></code>
description	The checked attribute allows you to check the box initially. An article is dedicated to the study of the use of check boxes.
appearance	<input checked="" type="checkbox"/>

HTML BASICS

□ Anatomy of a Hyper Text Markup Language Document:

```
<body>
  This is my first page !!!
</body>
```

○ body section - forms:

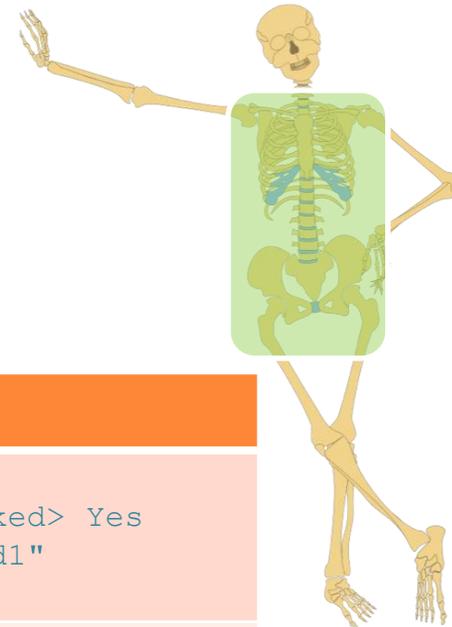

object	Radio button
code	<code><input type="radio" name="radiox" value="radio1"></code>
description	...
appearance	

HTML BASICS

□ Anatomy of a Hyper Text Markup Language Document:

```
<body>
  This is my first page !!!
</body>
```

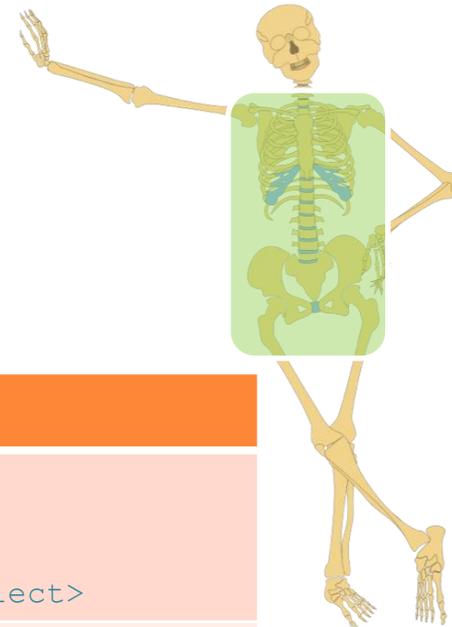

○ body section - forms:

object	Radio group
code	<pre><input type="radio" name="id1" value="true" checked> Yes <input type="radio" name="id1" value="false"> No</pre>
description	A radio button works as a checkbox. But a group of radio buttons allows an alternative: checking one unchecks others. So that the buttons are alternative, we must give the same name or id for all.
appearance	

HTML BASICS

□ Anatomy of a Hyper Text Markup Language Document:

```
<body>
  This is my first page !!!
</body>
```

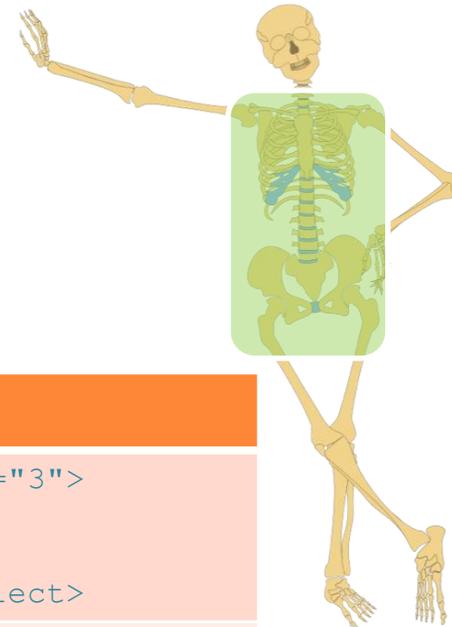

○ body section - forms:

object	Menu
code	<pre><select name="select"> <option>cherry</option> <option>orange</option> <option>apple</option> </select></pre>
description	The select tag and option inner tags allow to build a menu that can take the form of a scrolling list or a static list.
appearance	<input type="text" value="cherry"/>

HTML BASICS

□ Anatomy of a Hyper Text Markup Language Document:

```
<body>  
  This is my first page !!!  
</body>
```

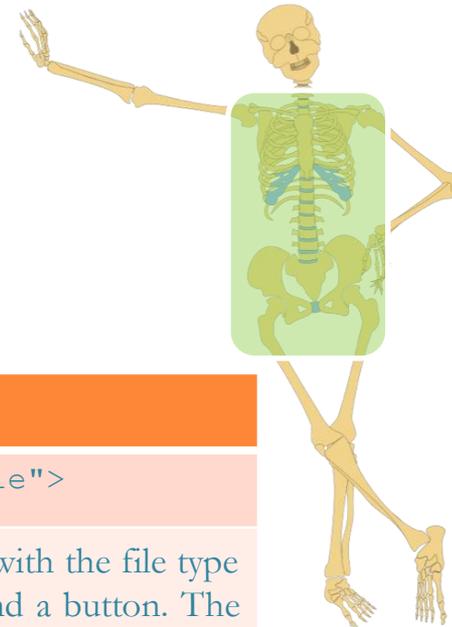

○ body section - forms:

object	List
code	<pre><select name="select2" size="3"> <option>cherry</option> <option>orange</option> <option>apple</option> </select></pre>
description	...
appearance	

HTML BASICS

□ Anatomy of a Hyper Text Markup Language Document:

```
<body>
  This is my first page !!!
</body>
```

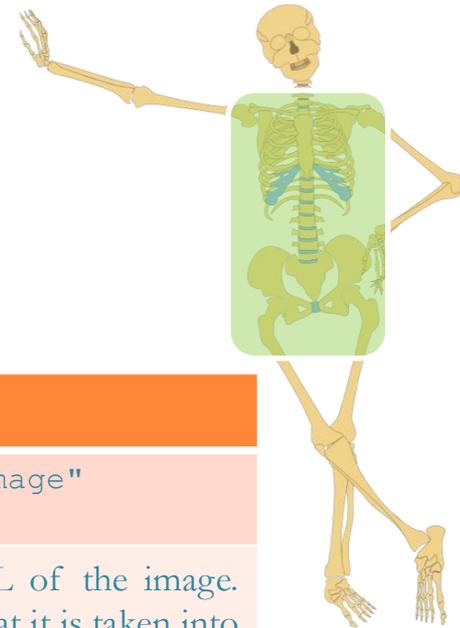

○ body section - forms:

object	File
code	<code><input type="file" name="file"></code>
description	HTML has a file selection function with the file type "file" which combines a text field and a button. The local filename is assigned to the value attribute of the object. The content of the local file is added to form data and sent with them.
appearance	

HTML BASICS

□ Anatomy of a Hyper Text Markup Language Document:

```
<body>
  This is my first page !!!
</body>
```

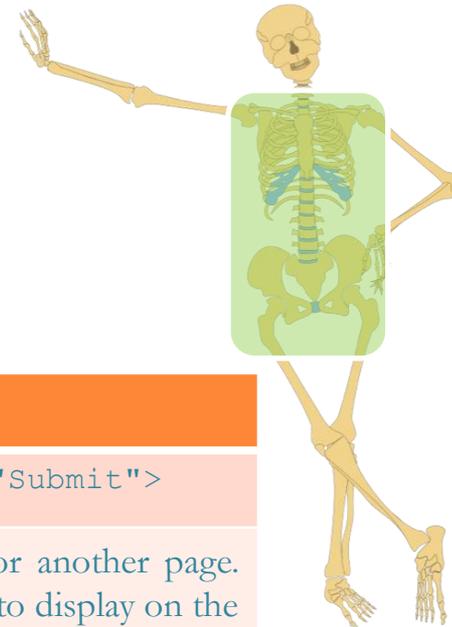

○ body section - forms:

object	Image
code	<code><input type="image" name="image" src="xulfr.gif"></code>
description	The src attribute indicates the URL of the image. The difference with the img tag is that it is taken into account in the form data passed to another page.
appearance	...

HTML BASICS

□ Anatomy of a Hyper Text Markup Language Document:

```
<body>  
    This is my first page !!!  
</body>
```

○ body section - forms:

object	Submit
code	<code><input type="submit" value="Submit"></code>
description	It send the form data to a script or another page. The value attribute defines the label to display on the button. When you press this button, the file defined by the action attribute of the form is loaded in place of the current page and the form data are given as parameters. We associate an onclick event to the submit buttons.
appearance	

HTML BASICS

□ Anatomy of a Hyper Text Markup Language Document:

○ A complete form example:

The image shows a web browser window with the address bar displaying `file:///C:/Users/User/Desktop/test.html`. The browser content is split into two parts:

- Left Panel (Code Editor):** Displays the HTML source code for a form. The code includes a `<form>` element with various input types: `<input type="button" value="Send" onclick="myfunction()">`, `<input type="text" name="mytext" value="default text">`, `<textarea name="textarea">content</textarea>`, `<input type="password" name="pass" value="12345">`, `<input type="hidden" value="code">`, `<input type="checkbox" name="cb1" value="true" checked>`, `<input type="radio" name="radiox" value="radiol">`, `<input type="radio" name="idl" value="true" checked> Yes`, `<input type="radio" name="idl" value="false"> No`, `<select name="select">` with options `<option>cherry</option>`, `<option>orange</option>`, and `<option>apple</option>`, `<select name="select2" size="3">` with options `<option>cherry</option>`, `<option>orange</option>`, and `<option>apple</option>`, `<input type="image" name="image" src="xulft.gif">`, and `<input type="submit" value="Submit">`.
- Right Panel (Rendered Form):** Shows the visual representation of the HTML code. It includes a `button - Send`, a `text - default text` input field, a `textarea - content` text area, a `password -` password field, a `hidden -` hidden field, a `checkbox - [checked]`, a `radio - [unselected]`, a `radio-set [selected] Yes [unselected] No`, a `drop down menu - cherry` dropdown menu, a `list menu - cherry, orange, apple` list menu, an `image-Submit Query` image button, and a `submit - Submit` submit button.

HTML BASICS

□ Anatomy of a Hyper Text Markup Language Document:

○ A complete form example:

```
<html>

<head>
</head>

<body>
<form name="myform" id="myform" action="page.html" onSubmit="return
fun()">
<br>button - <input type="button" value="Send" onclick="myfunction()">
<br>text - <input type="text" name="mytext" value="default text">
<br>textarea - <textarea name="textarea">content</textarea>
<br>password - <input type="password" name="pass" value="12345">
<br>hidden - <input type="hidden" value="code">
<br>checkbox - <input type="checkbox" name="cb1" value="true" checked>
<br>radio - <input type="radio" name="radiox" value="radio1">
<br>radio-set <input type="radio" name="id1" value="true" checked> Yes
<input type="radio" name="id1" value="false"> No
<br>drop down menu - <select name="select">
  <option>cherry</option>
  <option>orange</option>
  <option>apple</option>
</select>
<br>list menu - <select name="select2" size="3">
  <option>cherry</option>
  <option>orange</option>
  <option>apple</option>
</select>
<br>image-<input type="image" name="image" src="xulfr.gif">
<br>submit - <input type="submit" value="Submit">
</form>

</body>

</html>
```

HTML BASICS

□ Anatomy of a Hyper Text Markup Language Document:

○ HTML Tables:

Company	Contact	Country
Alfreds Futterkiste	Maria Anders	Germany
Centro comercial Moctezuma	Francisco Chang	Mexico
Ernst Handel	Roland Mendel	Austria
Island Trading	Helen Bennett	UK
Laughing Bacchus Winecellars	Yoshi Tannamuri	Canada
Magazzini Alimentari Riuniti	Giovanni Rovelli	Italy

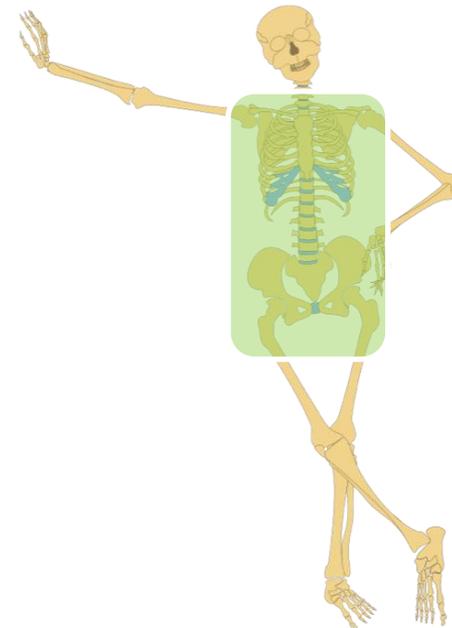

HTML BASICS

□ Anatomy of a Hyper Text Markup Language Document:

```
