

How to Install ObjectAid in 2022?

Asked 8 months ago Modified 1 month ago Viewed 8k times

ObjectAid was a very useful [Eclipse plug-in](#) which generates **class diagram** from your source code.

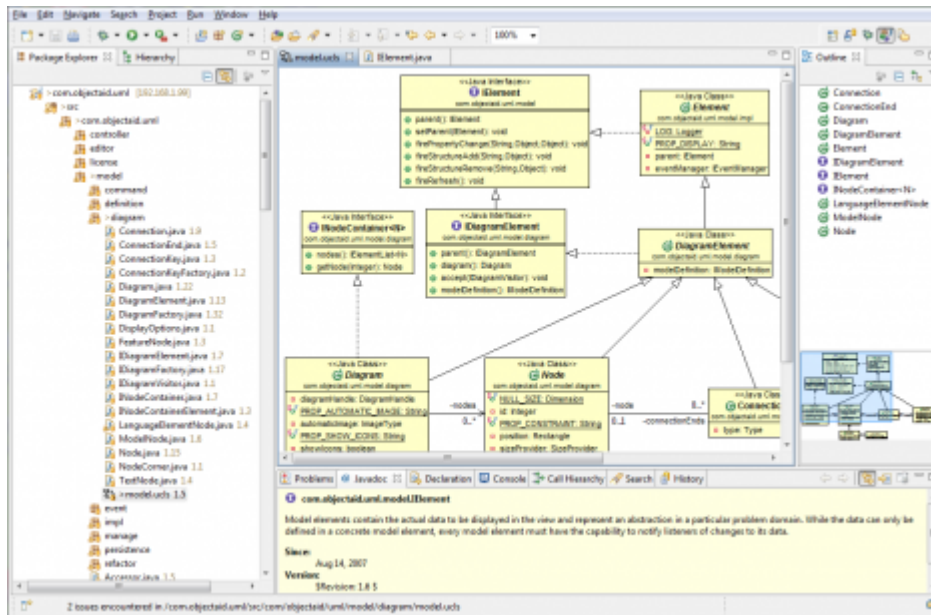

9

Unfortunately it looks like it is discontinued in March 2022 or at least [its website](#) is not working.

Can anyone tell me from where to download and install it?

[eclipse-plugin](#) [class-diagram](#) [objectaid](#)

Nobody knows what happened? Its marketplace is available but the website is gone?

marketplace.eclipse.org/content/objectaid-uml-explorer – Mohamed Ennahdi El Idrissi May 30 at 21:12

Does anyone has any way to know what happened? I was able to find these pages

ecorp.sos.ga.gov/BusinessSearch/... opencorporates.com/companies/us_ga/11007056 which says the company is "Status Admin. Dissolved" as of 09/30/2021 There is an agent name mentioned, "Felix Mayer", is anyone in US able to contact this agent and inquiry what happened? People (like me) still have paid licenses which I can't install anymore on new computers... – Cristiano Costantini Oct 5 at 14:43

I confirm the LinkedIn profile is the Felix Mayer of object aid, the contact info in LinkedIn mention the website: linkedin.com/in/felix-lj-mayer/overlay/contact-info – Cristiano Costantini Oct 5 at 17:54

- 2 Sad news, I think the author of ObjectAid was killed in a accident

I've been able to install an old version of ObjectAid. Here is what I did:

5

1. I downloaded **objectaid-1.1.14.zip** from [ObjectAid on web.archive.org](https://web.archive.org/web/20190113065017/http://www.objectaid.com/) 2019-Jan-13

Download

Below is the information of the remote Eclipse Update Site for the current section.

Name: ObjectAid UML Explorer
 URL: <http://www.objectaid.com/update/current>
 You can also [download a ZIP file](#) and use it as a local update site.

If you are running JDK 6 or 7, please use the 1.1.x release:

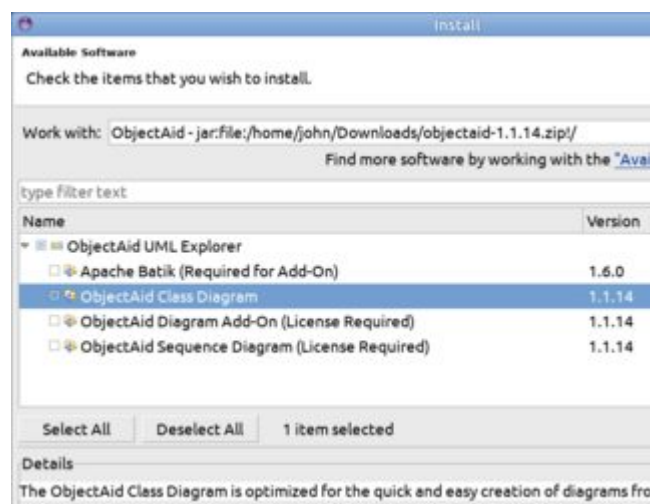

Name: ObjectAid UML Explorer 1.1.x
 URL: <http://www.objectaid.com/update/1.1>
 You can also [download a ZIP file](#) and use it as a local update site.

2. ...[OpenJDK 7](#)

3. ...and [Eclipse Juno 4.2.2](#)

4. An Eclipse plug-in called [Draw2D](#) was also needed.

5. Then I installed only ObjectAid Class Diagram for which **license is not required**.

Update

You can also download [version 1.2.4](#) which works with **Java 17** and **Eclipse 2022-03 (4.23.0)** but then you must follow the instructions from [this answer](#) to be able to run it.

This is not really a solution as it would last only until the hosting tear it down, but...

0

The objectaid.com website is actually still there: it's just the DNS that is gone.

You can open the website adding its old IP to your /etc/hosts file:

```
208.95.104.30 objectaid.com
```

The site is fully working, I can login and manage my licenses:

Account

Welcome, Cristiano [Logout](#)

Licenses Profile Transactions

Licenses [?](#) [Purchase](#) [Evaluate](#) [Send Email](#) [Transfer](#)

<input type="checkbox"/>	Identifier	Type	Description	Online
<input type="checkbox"/>	[REDACTED]	USER	Diagram Add-On 1.2.x	<input checked="" type="checkbox"/>
<input type="checkbox"/>	[REDACTED]	EVAL	Sequence Diagram 1.0.x	<input type="checkbox"/>
<input type="checkbox"/>	[REDACTED]	USER	Sequence Diagram 1.2.x	<input checked="" type="checkbox"/>

If you have a license, you may try to change it to an offline license with this trick.

P.S. If you didn't see my comments to other questions, the author of ObjectAid, [Felix Mayer](#) was sadly killed in an accident

https://www.mdjonline.com/neighbor_newspapers/northside_sandy_springs/news/sandy-springs-police-arrest-suspect-accused-of-killing-bicyclist-in-hit-and-run-case/article_ad23098e-889b-11ea-8b6b-c7acd8377384.html, website was left orphan and DNS name expired :-)
